SUMMARY

Data Analyst with a strong foundation in Python, SQL, and Power BI, experienced in transforming complex datasets into actionable business insights. Proven ability to clean, analyze, and visualize data to support decision-making across health, finance, and public sector projects. Skilled in building dashboards, identifying trends, and communicating findings to both technical and non-technical stakeholders.

TECHNICAL SKILLS

Programming & Analysis: Python (Pandas, NumPy, Scikit-learn, SciPy), SQL Data Visualization & BI: Power BI (Dashboards & Reports), Matplotlib, Seaborn	Machine Learning: Regression, Classification, Random Forest, Model Evaluation Data Handling: Data Cleaning, Preprocessing, Feature Engineering Tools & Technologies: Excel
---	---

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Feb 2025–Apr 2025

Dataverse Africa

- Identified critical data gaps across health, education, agriculture, and infrastructure sectors, enabling improved policy and investment decisions
- Developed interactive dashboards and geospatial visualizations using Power BI and QGIS to support data-driven insights
- Analyzed Nigerian trade and customs data, uncovering inefficiencies and proposing strategies to improve revenue collection
- Built a machine learning model to predict hypertension risk, supporting targeted health interventions
- Modeled rural financial instability in Uganda using regression and Random Forest to guide financial inclusion strategies

ML and AI Internship

Dec 2024 - Mar 2025

ULEARN

- Developed machine learning models using Python (Scikit-learn, TensorFlow, Keras) for real-world datasets
- Performed data preprocessing, feature engineering, and model evaluation to improve performance
- Built a face detection system using CNNs, OpenCV, and deep learning techniques
- Conducted exploratory data analysis (EDA) to identify trends and inform model development

Data Science Intern

Jun 2024 - July 2024

Prodigy InfoTech

- Built and evaluated machine learning models for real-world datasets
- Automated data preprocessing pipelines to improve efficiency and data quality
- Designed Power BI dashboards to visualize insights and support decision-making

KEY PROJECTS

Hypertension Risk Prediction Model

- Developed a predictive model using machine learning to identify at-risk individuals
- Supported healthcare decision-making through data-driven insights

Nigeria Trade Inefficiency Analysis

- Analyzed trade and customs data to identify bottlenecks and revenue leakages
- Provided actionable recommendations for improving efficiency

Spotify 2024 Listening Analysis

- Analyzed personal listening data using Python to uncover patterns in music preferences, listening frequency, and genre trends
- Created visualizations using Power BI to highlight peak listening periods and top artists, demonstrating data storytelling and exploratory analysis skills

Bank Loan Analysis

- Analyzed loan data to identify factors influencing loan approval and default risk
- Built visualizations and reports to support financial decision-making and risk assessment

EDUCATION

Bachelor of Science in Data Science
Adikavi Nannaya University

August 2022- March 2025

Applied Data Science Lab
WorldQuant University

June 2024–May 2025

Associate Data Science
Data Camp

April 2024 - Sept 2024

CERTIFICATES

Data Analysis and Visualization with Power BI (Microsoft) Sept 2024
Data Scientist Associate (Data Camp) Sept 2024
Data Analytics Essentials (Cisco) Jun 2024
Python for Data Science and AI (IBM) Mar 2024

SOFT SKILLS

- Strong analytical and problem-solving skills
- Effective communication (technical & non-technical audiences)
- Attention to detail
- Team collaboration and adaptability
